It is only 5 months until the 2019 UP Comrades Marathon. The UP RUN is known for The Big Five Hills: Kowies Hill, Fields Hill, Bothas Hill, Inchanga and Polly Shortts. The 1st 3 are all run in the 1st 40km with Inchanga taking you to 50km and Polly Shortts with a little over 10km to go. There are also many other climbs like Little Polly's, Umlaas Road and other unnamed hills, in short the UP Run is an enormous challenge. It is important to prepare physically for the challenge and in so doing also prepare for the psychological challenge of running 87 odd kilometers from Durban to Pietermaritzburg.

The focus up until now has been on laying a foundation and improving half Marathon speed. From January we look at preparing for a Marathon to qualify for Comrades and from there it is all about race day 9 June 2019.

Your biggest training months will be mid-March to early May and as such you should not be looking to do any hard races during this time.

If this is your first attempt at Comrades and you have not followed my Comrades programme for June-December, but you are a regular runner and can do a Half Marathon in 2hrs20 then this is the place for you to start. If you are not a regular runner and have not run a half marathon before or are slower than 2hrs20 then you need to look at considering 2020 as your 1st Comrades or contacting me directly for a training plan.

This programme is time based so people of more experience and greater running ability will get relatively more out of the programme and progress faster. Time based programmes also prevent you from settling on a route that you need to run faster every time you run that particular route. It is easier to maintain discipline and run easy on easy days. The aim is to be able to run a sub 4:50 marathon before Comrades.

Because you will employ a run walk strategy for your Qualifier, Long run and Comrades we will use this strategy in training. Very important to note about using a run walk strategy is that the walk is not a Sunday stroll but fast walking with purpose. It is a change in focus on the muscles not a "rest".

RECOVERY is important so DO NOT add extra running. It will however be massively beneficial if you add cross training or strength training to your schedule.

Note that training days are interchangeable, if your club does hill training on a different day or club long runs on a different day then you can change days around.

Training Paces for a 4:50 marathon:

Recovery (R):	7:30-7:50/km
Easy (E):	6:50-7:10/km
Long Runs (L):	6:55-7:25/km
Hills:	6:00-6:15/km
Time Trials (TT):	
4km	23:18
5km	29:45
8km	49:00

Start at the slower end of the training paces and move towards the faster end as you progress through the coming months of training.

Please note that if you cannot run the Time Trial times this does not mean you are not capable of a 4:50 Marathon. These are guidelines so there is some room either side.
